

Jean Koletto Reichmann **GALY**

BACKEND DEVELOPPER · DATA ENGINEER

Saint-Pierre, Réunion, France

☎ (+262) 693 50 18 66 | ✉ reichmann.galy@esiroi.re | 📱 ReichmannGaly | 🌐 Jean Koletto Reichmann GALY

Summary

Computer Science engineering student specializing in Data and AI. Practical experience in software architecture, backend development, and integrating open-source AI models into applications. Skilled in building automated data collection and web scraping pipelines.

Skills

Data & AI	Python, Pandas, Matplotlib, Apache Airflow, Geospatial Data (GIS), spaCy, NLTK, Hugging Face Transformers, Open-Source LLMs, Prediction Algorithms
Back-end & DB	Java, OOP, REST APIs, Spring Boot, Flask, Microservices, Celery, PostgreSQL, MySQL, JPA/Hibernate
Cloud & DevOps	AWS (EC2, Lambda, S3, RDS), Firebase, Docker, Kubernetes, CI/CD, Linux
Front-end	React.js, Next.js, TypeScript, HTML5, CSS, JQuery
Tools	Git, GitHub, GitLab, Jira, Linear

Work Experience

Software Engineering Intern

Saint-Pierre, Reunion, France

CAPSTON.AI

June - July 2026

- Reduced single-point-of-failure risk in a data collection pipeline serving 5 generative AI platforms (ChatGPT, Perplexity, Claude, Gemini, Google AI Overview) by implementing fallback providers with circuit-breaker and retry logic.
- Built an evaluation framework (Label Studio, MLflow) to benchmark brand-detection accuracy against a 120-response human-annotated ground truth, using precision, recall, F1, and Cohen's kappa to correct for class imbalance.
- Diagnosed a 0.44 recall in the existing keyword-based detector and redesigned it by combining accent-insensitive matching with a semantic similarity model, raising recall to 0.91 while maintaining precision.

Data Engineer Intern

Antananarivo, Madagascar

R@NDEVTEAM

July - October 2024

- Automated large-scale Reddit data collection, replacing manual extraction with a scheduled asynchronous pipeline.
- Cleaned and processed textual data with Pandas and spaCy (NLP), extracting structured signals from unstructured user content.
- Built interactive dashboards surfacing user interests and behavioral trends, informing product decisions that contributed to a measurable increase in client satisfaction.

Education

Engineering Degree in Computer Science - 2nd year

Sept. 2025 - Present

ÉCOLE SUPÉRIEURE D'INGÉNIEURS RÉUNION OCÉAN INDIEN (ESIROI)

Saint-Pierre, Reunion, France

- General engineering curriculum covering Systems & Networks, Data & AI, Web Development, IoT, and Cybersecurity.

Bachelor's Degree in Computer Science - Software Ecosystems

Nov. 2021 - Nov. 2024

HAUTE ÉCOLE D'INFORMATIQUE (HEI)

Antananarivo, Madagascar

- Focused curriculum on web development and DevOps, covering front-end, back-end, and infrastructure automation.

High school diploma in science

2021

CONDORCET-LYCÉE "LES PETITS LASCARS"

Antananarivo, Madagascar

Languages

French	C1 Level
English	B2 Level
Malagasy	Native language

Interests

Music	Music production (composition & mixing), piano, guitar, saxophone
Sport	Football, Beach Volley
